

Profiles

Managing Director, Robin Hamilton is an engineer, entrepreneur and inventor with over 40 years multi-discipline experience. Beginning as a staff engineer at Rolls Royce Aero Engines, he moved on to set up and manage a number of companies both in the UK and overseas.

Robin's career includes vehicle design (road and rail), motor racing, aerodynamics, waste management, recycling, waste to energy, broad-spectrum engineering and management consultancy. He has been granted over 30 International and National patents, many of which are currently used to manufacture products and machinery in use worldwide.

With the majority of his time during the last 15 years invested in environmental sectors, The Dumble has logically brought together Robin's experience into one topical project which he hopes will also help set an example of what can be achieved in recognition of global warming and increasing energy costs

Director, Ian Bevan RIBA is an architect with considerable experience across both public and private sectors.

Ian formed Cadenza in 1993 as an independent company specialising in computer-generated 3D modeling for the built environment, encompassing building design, architecture and construction. The company offers images and animations of high quality and realism, expanding into fully interactive multimedia and providing exclusive use to Home Revolution of VVM photomontage software.

Director, David Merton MRICS is also a partner of Fisher German, a partnership of Chartered Surveyors and rural property consultants serving clients countrywide, with more than 150 partners and staff.

David's areas of expertise are Professional Services, Property Sales & Lettings and Estate management; he is responsible for a number of estates and portfolios on behalf of both private, commercial and institutional clients. David also heads the Ashby de la Zouch Agency Department of Fisher German as well as advising and specializing in agricultural and rural finance.

With over 15 years post qualification experience, David sits on the Derbyshire CLA Committee as well as being involved with a number of other rural organizations.

Planning Consultant, Kay Davies BSc (Hons) Dip TP MRTPI also heads Fisher German's Planning Team. Prior to her current position, she worked as an independent planning consultant in public and private sectors and was elected a Member of the Royal Town Planning Institute in 1998.

With a wealth of experience gained from working for Planning Authorities, Kay now advised on all planning matters encompassing site appraisals, planning applications, appeals, local plan promotion and interpretation of Government Planning Guidelines.

Fisher German is the trading name of Fisher German LLP, a partnership of Chartered Surveyors and rural property consultants serving clients countrywide, with more than 150 partners and staff. With 7 offices, they have been managing and selling estates, farms and rural property for the last 160 years. Specialities include planning, development and building design, with nationally recognised departments dealing with wind farms, pipelines/utilities and telecom sites.

Fisher German's client base is made up of private, institutional and corporate clients, managing in excess of half a million acres of property with a rental income of more than £30,000,000 per annum.

60% of all wind farms in the whole of England and Wales currently in planning have been dealt with by Fisher German's renewable energy team. Fisher German is represented on Home Revolution's Board by David Merton MRICS as a Director, and by Kay Davies as a Planning Consultant.
